## REFERENCES

The instructions for editing scientific and professional texts at AMEU-ISH state that the author's last name, the year of publication of the cited work, and the page must be written after the citation **in the form (last name year, page)**, for example (Pollan 2006, 54). If there is more than one author of the cited work, this is given in the form (surname and surname year,

page), e.g. (Ward and Burns 2007, 58). If there are more than three authors, the form (surname et al. year, page) is used, e.g. (Barnes et al. 2010, 44).

At the end of the text, under the heading "Bibliography," there should be a list of all bibliographic units used, in alphabetical order. This should be arranged according to the following example:
